PT. Mulya Sejahtera Technology (PT. MSTech

PT. Mulya Sejahtera Technology [MSTech] is a local, private MRO (Maintenance Repair Overhaul) company established in 2006 and certified by the Indonesian Directorate General of Civil Aviation (DGCA) with AMO Certificate No. 145D-598.

We have provided specialized aircraft maintenance services to various aircraft operators in Indonesia and throughout the Southeast Asian region.

MSTech has established itself as a well-established and reliable company over the years and continues to expand its business to accommodate the growth of the global aircraft industry.

We are dedicated to serving our customers with the best performance and aim to be "Your Best Partner in the Aviation Business."

Yours Sincerely,
Novin Wiryanto

Our Service Focus

Base Maintenance

- Base Maintenance capable of performing inspections up to and including the C Check level is a highly specialized facility equipped with the tools, infrastructure, and technical expertise to handle complex and detailed maintenance tasks. These facilities are authorized by relevant aviation regulatory authorities and adhere strictly to the standards set by the aircraft manufacturers and maintenance manuals, For aircraft types such as the Boeing 737 Classic, Airbus A320, ATR 72, and others

Line Maintenence Service

- Pre-Fligh Check, Daily Check, Until ‘A’ Check

Non Destructive Test [NDT]

- Non-Destructive Testing (NDT) is a critical service in aircraft maintenance used to detect internal or hidden defects in the structure of an aircraft without causing damage to the components being inspected. This method ensures both the safety and structural integrity of the aircraft while allowing it to return to service with minimal downtime.
